From the Public Health Director...

Public Health is population health. We look beyond the health of a single person. We promote healthy communities.

Our goal is to keep you from ending up in the doctor’s office. We know the things that affect health happen mostly outside the doctor’s office—in homes, schools, worksites, and neighborhoods.

Health starts where people live, work and play. So that’s where we focus our work.
MISSION
Garfield County Public Health Department - working to promote health and prevent disease.

STANDARDS

VISION
VISION

Our vision is that residents of Garfield County have access to resources that promote optimal health, safety, and well-being.
STANDARDS

Garfield County Public Health Department is committed to the highest standards of health for individuals and communities.

Health in Garfield County

What Garfield County Public Health is Doing in Our Community
Improving Food Choices for Better Nutrition

- Healthy Foods and Beverages group examines food offerings at vending machines and concessions in public locations
- Emphasis on implementing policies that promote purchasing and supplying healthier food options for consumers
Providing Options for Physical Activity by Improving the Built Environment

- The design of cities and towns can help residents become more active and lead healthier lives.

- The Built Environment work-group works with municipalities to adopt strategies focused on improved access to active living.

- Increase walking/bike paths, smart growth/smart development, access to parks and open spaces.
Workplace Well-Being Programs for Healthier Communities

- By promoting healthy choices at work, employers can provide the access, opportunity, support and encouragement needed for workers to actively participate in improving their personal health, as well as an organization’s fiscal health.

- Garfield County is partnering with local employers to develop low, to no-cost personnel and workplace policies that make a real impact.

For every 1 dollar spent by employers in workplace wellness programs, there was an average savings of MORE THAN 3 DOLLARS.
Health Promotion

Health in Garfield County
